

# RATS *in Lala Land*

Some bands play music. Rats in Lala Land escape it.

Born in Hallein, Austria, and built on the collision of backgrounds too diverse to contain, Rats in Lala Land are the antidote to everything polished, predictable, and safe. Their sound tears through genre boundaries with the reckless confidence of a band that has nothing to prove and everything to say — guitar-driven grooves thick with blues grit, funk-laced basslines that refuse to sit still, and vocal lines that grab you by the collar and don't let go.

This is heavy, funky, blues-rock at its finest — and messiest. Drawing from a DNA that stretches from 70s groove to punk, Fusion Jazz to Metal, the Rats don't pick a lane. They own the whole road.

The name says it all. "Lala Land" — that comfortable, sterile dreamworld of mainstream pop — is exactly where these rats don't belong. While the charts keep cooking in their own juice, Rats in Lala Land are out here making music that feels alive: raw, infectious, and defiantly real.

With a frontwoman whose energy is nothing short of magnetic, power beats that hit like a freight train, and riffs that stick around long after the last note fades, their live shows are the kind you talk about on the way home.

Catch them where the real music happens.
